Treatment Accessibility Platform

2018 – 2023 Bamboo Health – Open Beds

2023 – New Procurement Process

The recent proposal process was an opportunity for OSMAAP to refine and strengthen the services needed to address the current landscape of treatment and resources in Alaska. We expect a more robust, effective, user friendly, 2023 platform. OSMAAP is confident this treatment access platform will meet the state's long-term vision of providing a valuable resource for all Alaskans seeking treatment.

The Treatment Accessibility Platform will provide:

Increased Access

Streamline Communication

Improved Coordination

Increase Access

- ❖ Address the needs of Alaskans who are ready to heal and commit to treatment or behavioral health services.
- ❖ Replace traditional and inefficient manual searches for treatment options.
- ❖ Help resolve accessibility limitations which cause months and months of delays to get into a program which can lead to more substance use and spirals in mental health.

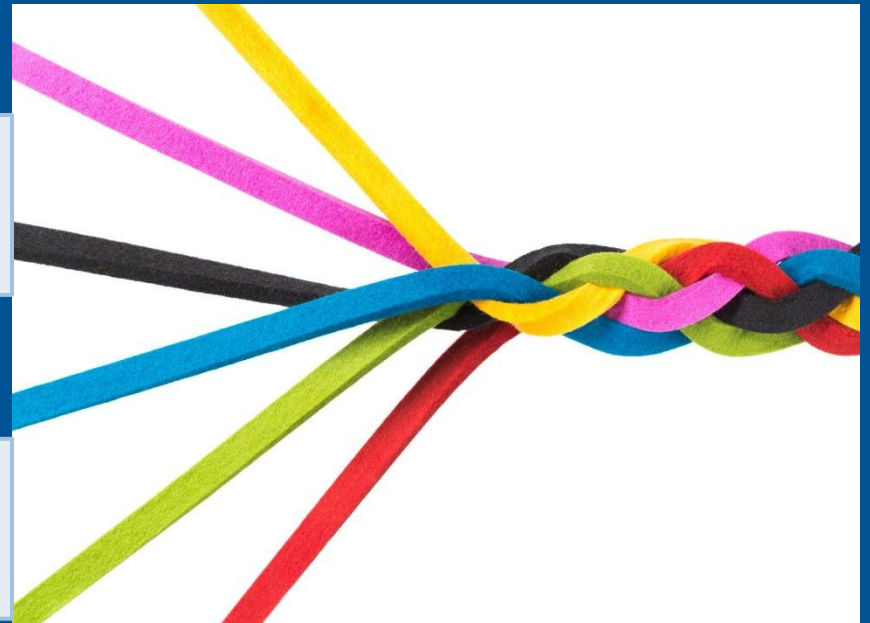

Streamline Communications

- ❖ Continuous inventory of available services
- ❖ Provide digital screening, intake and registration
- ❖ Facilitate referrals to facilities
- ❖ Provide digital communications
- ❖ Consumer access to the network via mobile device capabilities

Improve Connections
